## DETAIL ACTION

### *Notice to Applicant(s)*

1. This application has been examined. Claims 1-19 has been canceled. Thus, claims 20-38 are pending.
2. The prior art submitted on January 10, 2006 has been considered.
3. Receipt is acknowledged of papers submitted under 35 U.S.C. § 119, which have been placed of record in the file.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 20-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Eisele et al. (2003/0051530).
6. As per claim 20, Eisele et al. disclose the invention as claimed which includes a first sensor for acquiring the vehicle impact and for output a first signal sensor (see paragraph [0005]), a control for outputting a trigger signal dependent on the first sensor signal (see at least paragraphs [0006] and [0022]), a restraint system that is triggered dependent on the first sensor for protection of a vehicle occupant during a vehicle impact (see figure 1, item 11), a second sensor arrangement for acquiring the obstacle

in a vicinity of the vehicle and for outputting a second sensor signal (see at least figure 1, items 1-3 and paragraph [0005], lines 8-10), a third sensor arrangement for acquiring an environment influence on the second sensor arrangement and for outputting a third sensor signal dependent on the environment influence (see at least the temperature sensor in paragraph [0021]), and the control device determines based on the second sensor signal, whether to trigger the restraint system after the an evaluation of the third sensor (see at least figure 2 and the related text).

7. As per claim 21, Eisele et al. disclose that the first sensor includes an acceleration (see paragraph [0005]).
8. As per claim 22, Eisele et al. disclose that the second sensor includes an ultrasonic (see paragraph [0005], line 10).
9. As per claim 23, Eisele et al. disclose that the restraint system includes a multiplicity of restraint devices (see at least paragraph [0012] and [0022]).
10. As per claim 24, Eisele et al. disclose that the restraint system includes an airbag 11 as shown in figure 1.
11. As per claim 25, Eisele et al. discloses that the first, second and third sensors arrangement form a sensor system (see figure 1).
12. As per claim 26, Eisele et al. disclose that the third sensor includes a temperature sensor (see paragraph [0021]).
13. With respect to claims 27-38, the limitations of these claims have been noted in the rejections above and in the teaching of the Eisele et al. reference. They are therefore considered rejected as set forth above.

### ***Conclusion***

14. All claims are rejected.

15. The following references are cited as being of general interest: Farmer (6,832,156) and Browne et al. (2004/0254729).
